Diploma in Supervision 2019-2020

An Adlerian Integrative Approach | Accredited by ASIIP

Course overview

This 125-hour assessed training offers participants an opportunity to develop their understanding of the theory, practice, ethical standards and values necessary for the supervision of counsellors and those in allied professions. The course integrates the work of Hawkins & Shohet, and Inskipp & Proctor, underpinned by an Adlerian base emphasising encouragement, an holistic approach and an understanding of the social purpose of human interaction. Participants are encouraged to explore and integrate additional supervisory ideas.

A core value is of a supervisory process that is negotiated to honour individual differences, and that enables collegial working relationships to support development for all. Therefore, we explore issues around ethics of difference and equality in each of the modules.

Entry requirements

The course is open to experienced practitioners, from a range of theoretical backgrounds, both those who are already supervising others in the helping professions, and those who are considering undertaking supervisory work. Numbers are limited to 14.

Participants are required to have a minimum of three years post-qualifying practitioner experience as a counsellor, psychotherapist, psychologist or allied professional. It is not necessary to be working with supervisees at the start of training as the course structure involves taking a supervisory role, outside the module hours, with another trainee. However, trainees will be expected to have at least one external supervisee by the end of March, with a minimum of two by the end of their training.

The course aims to encourage informed and mature reflective supervision practice through the monthly training sessions and regular group supervision of supervision. Self- and peer-assessment, and individual goal setting, alongside tutor guidance, are key aspects of the course.

Accreditation

The course is accredited and certificated by the Adlerian Society UK and Institute for Individual Psychology (ASIIP). The curriculum is in line with the BACP Supervision training recommendations. The award of the Diploma in Supervision is made to participants who complete all the required criteria.
